Mission of the CARE team:

The Indiana University CARE Team is a multidisciplinary team of professionals facilitated by the Dean of Students Office that provides care and assistance to students who are exhibiting concerning behaviors. The mission of the Care team is to provide a proactive and team approach to enhance the physical and emotional safety of students and promote student academic success in order to support the teaching-learning environment of the University.

Goals:

- Facilitate early intervention with students who appear to be struggling socially, academically or personally
- Provide better wrap around support such that all units who are or could assist a student work collaboratively to the extent possible
- Prevent students from causing disturbances and and/or threats to the campus community
