The School Psychology Program admits students directly from undergraduate programs. Indiana University permits a transfer of up to 30 applicable graduate credits from another university or college that is not part of the University system. Students entering with a graduate degree in School Psychology may be able to reduce the typical time to completion from about five years to four years. Students entering with graduate degrees in areas such as counseling and clinical psychology typically can transfer about 12 to 21 hours toward their degrees, most often in the form of minor courses or having taken comparable courses. However, the number of years to completion typically is not reduced, but students can expect lighter course loads in some semesters. The number of hours that may be transferred depends upon the coursework completed and its relevance to the program curriculum.

## Licensure

Outcome	2007-2017
The total number of program graduates (doctoral degrees conferred on transcript) between 2 and 10 years ago	45
The number of these graduates (between 2 and 10 years ago) who became licensed psychologists in the past 10 years	26
Licensure percentage	58%

It should be noted that not all graduates seek licensure for the independent practice of psychology, but choose to work in public schools where licensure is not required. All graduates who have sought independent practice licensure have obtained it. The other graduates are licensed or certified as school psychologists by state departments of education and are working in public schools. Also, some graduates enter academic or research positions where licensure is not required. Several graduates are in the process of completing licensure requirements.
