

EARLY INQUIRY EXPERIENCE APPROVAL

School of Education Doctoral degrees require an early inquiry experience, during which a student carries out a research project, including the collection and analysis of data to answer a research question, and the writing of a research manuscript. This research is to be prior to the dissertation and not a direct part of the dissertation research. The early inquiry experience may be implemented through an independent study course (e.g., a 590 course), through a master's thesis (e.g. 599 course), or through a departmental research seminar. Each student must carry out an independent research project. The research manuscript that results from this study must be read and approved by the student's advisory committee.

Student Information

Name _____ ID Number _____
 Degree _____ Department: _____

Method of meeting requirement:

List course number, title, and semester if applicable. If using a Master's Thesis, please explain how it relates to the Doctoral Degree.

Independent Study Course:

Master's Thesis:

Departmental Research Seminar:

Other:

ADVISORY COMMITTEE SIGNATURES

This is to certify that I have read the research report describing the early inquiry study carried out by the above named student, and that I find in this report evidence of satisfactory research skills for nomination to candidacy.

Chair: _____

Date: _____

Member: _____

Date: _____

Minor member: _____

Date: _____
